

Daniel Wong Jerng Foong

Senior professional with deep experience across logistics analytics, ERP, and finance Bandar Rimbayu, Selangor, Malaysia wongjerngfoong@gmail.com | LinkedIn

Professional Summary

Network planning manager with five years at Lazada Logistics (Alibaba Group), currently contributing to regional optimization initiatives focused on the Philippines hub-location and coverage network. Combines applied operations research (SCIP-based optimization, meta-heuristics) with hands-on geospatial analysis (QGIS, Leaflet.js) and data engineering (SQL, Excel Power Query / M) to turn logistics problems into measurable network decisions across First Mile, Line Haul, and Last Mile. Earlier career spans ERP functional consulting on Microsoft Dynamics AX/NAV and ACCPAC, IT audit at Deloitte (CISA), and finance/accounting roles — a process-and-controls foundation that supports cross-functional work with operations, finance, and engineering stakeholders. Master of Decision Science (Universiti Utara Malaysia) with research interests in operations research, meta-heuristics, and optimization.

Experience

Lazada (Alibaba Group) | Nov 2020 – Present

Manager, Regional Network Planning | May 2024 – Present - Implement data engineering and geo-spatial analysis initiatives to establish foundational frameworks for network optimization in the Philippines (PH). - Build and maintain production analytical SQL pipelines on Alibaba MaxCompute (ODPS) — a cloud columnar data warehouse conceptually equivalent to Snowflake or BigQuery — applying partitioned table design and query cost optimization. - Manage technical data workstreams for optimization projects, including project management for the migration of internal products like Starwheel to LOP (internal parcel tracking status tool). - Develop and maintain network coverage dashboards to provide visibility and facilitate data-driven decision-making across regional teams. - Collaborate with regional stakeholders to drive optimization and network initiatives for both existing and new projects.

Senior Associate, Regional Network Planning | May 2023 – May 2024 - Developed hub location optimization modelling using HELIOS (project code for optimization projects) for the PH network expansion (HYPERION). - Provided guidance to junior team members and collaborated with regional and local stakeholders to ensure project alignment. - Managed complex regional responsibilities, demonstrating resilience and a focus on delivering results in a demanding environment.

Senior Associate, Network Planning | Jan 2023 – June 2023 - Supported various business functions by providing data-driven insights and improving network visibility. - Focused on enhancing technical capabilities in geospatial analysis and visualization technologies to support logistics infrastructure projects.

Associate, Network Planning | Jan 2022 – Dec 2022 - Analyzed transportation networks across First Mile, Line Haul Service (LHS), and Last Mile using GIS tools such as QGIS. - Utilized SQL to extract and analyze data, presenting findings to support network capacity decisions. - Forecasted network volumes to assess the impact on facility setup, builds, and closures. - Built comprehensive dashboard reports for monitoring logistics performance.

Associate, Fleet Payment | Nov 2020 – Jan 2022 - Focused on Logistics Billing and payment operations, ensuring 100% effort due diligence and on-time execution of fleet-related payments. - Automated payment processes using Excel Power Query and M Language, significantly reducing manual processing time and improving process continuity. - Consolidated multiple data sources into existing payment files to streamline month-end reconciliation with subcontractors.

Careware Systems Sdn Bhd

Functional Consultant | Aug 2017 – Aug 2018 - Gathered system requirements and mapped customer process flows against standard ERP flows to identify gaps. - Prepared business flow documentation and conducted training and User Acceptance Testing (UAT).

Tectura

Support Consultant | June 2015 – Dec 2016 - Analyzed support tickets to determine root causes, reproduced errors, and escalated technical issues to the implementation team. - Documented solutions and workarounds in the Support CRM portal and updated management on issue status.

Functional Consultant | Oct 2014 – June 2015 - Lead consultant for GST solution implementation projects, ensuring successful proposal, implementation, and testing. - Conducted training sessions for customers and provided post-live support.

9 Dots Consulting

Functional Consultant | Feb 2014 – July 2014 - Served as a functional consultant for Microsoft Dynamics AX implementations.

Advance Infosys Sdn Bhd

Business Analyst | Feb 2012 – Sept 2013 - Involved in full life-cycle ERP implementations for clients in the remittance and retail sectors. - Gathered requirements, drafted functional requirement documents, and tested system customizations.

Columbia Leisure Sdn Bhd

Account Executive | May 2011 – Dec 2011 - Managed cash flow and accounts for a medium-sized travel agency, handling bank reconciliations and credit card transactions.

Malaysian Care

Finance Officer | July 2010 – May 2011 - Managed a full set of accounts, including budgeting and bank reconciliations, reporting directly to the Finance Director.

Deloitte

Business Analyst | Aug 2009 – July 2010 - Participated in IT audits for risk-based assessments, focusing on SAP and UNIX-based systems. - Worked in team environments to identify risks and mitigate controls.

Malaysian Care

Account/IT Staff | July 2007 – Oct 2009 - Implemented the ACCPAC accounting system and managed hardware and network support for the organization.

Careware Systems

Software Support | Dec 2005 – June 2007 - Assisted senior consultants with ERP implementations, focusing on software installation and user training.

Ideal Perfect

Software Support | June 2005 – Dec 2005 - Provided software support for UBS accounting software.

Education

- **Master of Decision Science**, Universiti Utara Malaysia | 2018 – 2022
- **Bachelor of Accountancy**, Universiti Tenaga Nasional | 1999 – 2004

Skills & Certifications

- **Technical Skills:** SQL, Excel Power Query, M Language, QGIS, Geospatial Analysis, Data Visualization (FBI/Starwheel).
- **Data Platforms:** Alibaba MaxCompute (ODPS) — cloud columnar data warehouse, conceptually equivalent to Snowflake / BigQuery.
- **ERP Systems:** Microsoft Dynamics AX, Microsoft Dynamics NAV, ACCPAC, SAP (IT Audit).
- **Certifications:** Python Data Structures, MS Microsoft Dynamics AX 2012 R3 Financials, MCTS Microsoft Dynamics NAV 2009 Core Setup and Finance, CISA (Certified Information Systems Auditor - Passed).
- **Languages:** English (Native/Bilingual), Bahasa Malaysia (Native/Bilingual), Cantonese (Limited Working).
