

Daniel Wong Jerng Foong

Business Intelligence Analyst / BI Developer — Power BI (Power Query / M) · SQL · data modeling · dashboards Bandar Rimbayu, Telok Panglima Garang 42500, Selangor, Malaysia wongjerngfoong@gmail.com | 016-3119496 | LinkedIn

Professional Summary

Business-intelligence and data-analytics professional with five years owning the dashboard lifecycle at Lazada Logistics (Alibaba Group) — gathering requirements, modeling data, and delivering network-coverage dashboards used across regional teams. Works daily in **Power Query and the M language — the transformation engine that underlies Power BI** — and builds production SQL data models on a cloud data warehouse with partitioned-table and data-quality discipline, applying data-warehouse concepts such as star schema and slowly changing dimensions. Connects and transforms data from SQL, Excel, and APIs, and communicates results to technical and non-technical stakeholders. A Master of Decision Science underpins the modeling and analytical work; CISA and ERP-delivery experience add controls and governance rigor. Currently ramping on the Power BI Service layer (workspaces, gateways, scheduled refresh, Row-Level Security) and DAX from a strong Power Query / M and data-modeling foundation.

Core Skills

- **Business Intelligence:** end-to-end dashboard development (requirements → data modeling → delivery), data modeling for reporting, data visualization, enterprise BI platforms (FBI / Starwheel).
- **Power BI stack:** Power Query / M (Power BI's data-transformation engine — used in production daily); ramping on Power BI Service (workspaces, gateways, scheduled refresh, Row-Level Security) and DAX.
- **Data:** SQL, partitioned-table data models, data-quality controls, ETL, data-warehouse concepts (star schema, slowly changing dimensions).
- **Data sources / integration:** SQL, Excel, APIs, SharePoint, Azure.
- **Analysis & optimization:** Python (Python Data Structures), R, SCIP / meta-heuristics; Master of Decision Science.
- **Geospatial:** QGIS, Leaflet.js, geospatial analysis.
- **ERP & Governance:** Microsoft Dynamics AX / NAV, ACCPAC, SAP (IT audit); CISA.
- **Certifications:** CISA (Passed), Python Data Structures, MS Dynamics AX 2012 R3 Financials, MCTS Dynamics NAV 2009.
- **Languages (spoken):** English (Native/Bilingual), Bahasa Malaysia (Native/Bilingual), Cantonese (Limited Working).

Experience

Lazada (Alibaba Group) | Nov 2020 – Present

Manager, Regional Network Planning | May 2024 – Present - Develop and maintain network-coverage dashboards used across regional teams — from requirements gathering through data modeling to stakeholder presentation. - Build and maintain SQL data models and pipelines on a cloud data warehouse (Alibaba MaxCompute / ODPS), applying partitioned-table design, query-cost optimization, and data-quality controls. - Automate data transformation with Power Query and the M language (the engine underlying Power BI), consolidating multiple sources into reconciled, reporting-ready data sets. - Manage data workstreams and data migration for optimization projects, including Starwheel to LOP (internal parcel-tracking tool). - Communicate insights to technical and non-technical regional stakeholders.

Senior Associate, Regional Network Planning | May 2023 – May 2024 - Prepared and validated data for hub-location optimization models (HELIOS) on the PH network expansion (HYPERION). - Provided guidance

to junior team members and aligned with regional and local stakeholders.

Senior Associate / Associate, Network Planning | Jan 2022 – June 2023 - Extracted and analyzed transportation-network data with SQL and GIS tools (QGIS); forecasted network volumes. - Built dashboard reports for monitoring logistics performance across First Mile, Line Haul, and Last Mile.

Associate, Fleet Payment | Nov 2020 – Jan 2022 - Automated payment reporting using Excel Power Query and M (the Power BI transformation engine), streamlining month-end reconciliation with subcontractors.

Earlier Career — ERP Delivery, IT Audit & Finance

- **Functional Consultant**, Careware Systems (2017–2018) — requirements gathering, ERP gap analysis, UAT, training.
- **Support / Functional Consultant**, Tectura (2014–2016) — Dynamics support and root-cause analysis; drove GST solution implementation projects and customer training.
- **Functional Consultant**, 9 Dots Consulting (2014) — Microsoft Dynamics AX implementations.
- **Business Analyst**, Advance Infosys (2012–2013) — full life-cycle ERP implementations; functional requirements and customization testing.
- **Account Executive**, Columbia Leisure (2011) — cash flow, reconciliations.
- **Finance Officer / Account & IT Staff**, Malaysian Care (2007–2011) — full set of accounts; implemented ACCPAC and managed IT/network support.
- **Business Analyst**, Deloitte (2009–2010) — IT audits on SAP and UNIX-based systems.
- **Software Support**, Careware Systems / Ideal Perfect (2005–2007) — ERP and UBS accounting software support and training.

Education

- **Master of Decision Science**, Universiti Utara Malaysia | 2018 – 2022 — operations research, meta-heuristics, optimization.
- **Bachelor of Accountancy**, Universiti Tenaga Nasional | 1999 – 2004.
