

Daniel Wong Jerng Foong

Network Optimization & Geospatial Analyst — Operations Research · Route & Hub-Location Optimization · GIS (QGIS, Leaflet.js) · SQL Bandar Rimbayu, Telok Panglima Garang 42500, Selangor, Malaysia
wongjerngfoong@gmail.com | 016-3119496 | LinkedIn

Professional Summary

Operations-research and geospatial analyst with five years optimizing logistics networks at Lazada Logistics (Alibaba Group). Builds hub-location and network optimization models (SCIP solver, meta-heuristics) and analyzes First Mile, Line Haul, and Last Mile networks across the Philippines and regional markets, pairing mathematical optimization with hands-on geospatial analysis (QGIS, Leaflet.js) and SQL-based data preparation. Translates network problems — facility location, coverage, capacity, and volume forecasting — into measurable decisions, and communicates them through network-coverage dashboards for regional stakeholders. A Master of Decision Science (operations research, meta-heuristics, optimization) anchors the modeling work, while a foundation in ERP delivery and IT audit (CISA) supports cross-functional delivery with operations, finance, and engineering teams.

Core Skills

- **Optimization / Operations Research:** hub-location and facility-location optimization, network and route optimization, mixed-integer optimization (SCIP solver), meta-heuristics, scenario modeling, supply-chain network design.
- **Geospatial / GIS:** QGIS, Leaflet.js, geospatial analysis, spatial data, network-coverage mapping, location-based analysis.
- **Logistics & Supply Chain:** network planning (First Mile, Line Haul / LHS, Last Mile), capacity planning, volume forecasting, hub network design.
- **Data & Programming:** SQL (production pipelines on Alibaba MaxCompute / ODPS), Python (Python Data Structures), R, Excel Power Query / M (ETL).
- **Visualization:** network-coverage dashboards, enterprise BI (FBI / Starwheel), data visualization.
- **ERP & Delivery:** Microsoft Dynamics AX / NAV, ACCPAC, SAP (IT audit); SDLC, Agile, UAT.
- **Certifications:** CISA (Certified Information Systems Auditor — Passed), Python Data Structures, MS Dynamics AX 2012 R3 Financials, MCTS Dynamics NAV 2009.
- **Languages (spoken):** English (Native/Bilingual), Bahasa Malaysia (Native/Bilingual), Cantonese (Limited Working).

Experience

Lazada (Alibaba Group) | Nov 2020 – Present

Manager, Regional Network Planning | May 2024 – Present - Develop network optimization and geospatial frameworks for hub-location and coverage planning in the Philippines (PH). - Build SQL data models and pipelines on a cloud data warehouse (Alibaba MaxCompute / ODPS) to feed optimization and network analysis. - Maintain network-coverage dashboards (QGIS, Leaflet.js, BI) to support data-driven regional decisions. - Manage technical workstreams for optimization projects, including the migration of Starwheel to LOP (internal parcel-tracking tool). - Collaborate with regional stakeholders on optimization and network initiatives.

Senior Associate, Regional Network Planning | May 2023 – May 2024 - Developed hub-location optimization models (HELIOS, SCIP-based) for the PH network expansion (HYPERION), preparing and validating the underlying data. - Provided guidance to junior team members and aligned with regional and local stakeholders.

Senior Associate / Associate, Network Planning | Jan 2022 – June 2023 - Analyzed First Mile, Line

Haul (LHS), and Last Mile networks using GIS tools (QGIS) and SQL to support network-capacity decisions. - Forecasted network volumes to assess facility setup, builds, and closures; built dashboard reports for monitoring logistics performance.

Associate, Fleet Payment | Nov 2020 – Jan 2022 - Automated payment data flows with Excel Power Query and M (ETL), consolidating multiple sources and reducing manual processing time.

Earlier Career — ERP Delivery, IT Audit & Finance

- **Functional Consultant**, Careware Systems (2017–2018) — requirements gathering, ERP gap analysis, UAT, training.
- **Support / Functional Consultant**, Tectura (2014–2016) — Dynamics support and root-cause analysis; drove GST solution implementation projects and customer training.
- **Functional Consultant**, 9 Dots Consulting (2014) — Microsoft Dynamics AX implementations.
- **Business Analyst**, Advance Infosys (2012–2013) — full life-cycle ERP implementations; functional requirements and customization testing.
- **Account Executive**, Columbia Leisure (2011) — cash flow, reconciliations.
- **Finance Officer / Account & IT Staff**, Malaysian Care (2007–2011) — full set of accounts; implemented ACCPAC and managed IT/network support.
- **Business Analyst**, Deloitte (2009–2010) — IT audits on SAP and UNIX-based systems.
- **Software Support**, Careware Systems / Ideal Perfect (2005–2007) — ERP and UBS accounting software support and training.

Education

- **Master of Decision Science**, Universiti Utara Malaysia | 2018 – 2022 — operations research, meta-heuristics, optimization.
- **Bachelor of Accountancy**, Universiti Tenaga Nasional | 1999 – 2004.
